

Structured cabling & network infrastructure — delivered direct, or as a trusted subcontractor.

GLOBALPROCABLING installs and certifies copper, fibre and comms room infrastructure for commercial sites across the UK — working directly for businesses, and as discreet white-label and overflow teams for the cabling, M&E, fit-out, electrical and FM contractors who deliver for them. London base. Nationwide mobilisation.

£5M PUBLIC LIABILITY · £10M EMPLOYERS' LIABILITY · CERTIFIED ENGINEER TEAMS ·

WHAT WE DO

Structured Cabling

Cat5e / Cat6 / Cat6A first & second fix — offices, warehouses and commercial sites. Floor boxes, consolidation points, full dressing and labelling.

Fibre Optic Cabling & Termination

OS2 single-mode and OM3/OM4 multimode. Fusion splicing, MTP/MPO systems, OTDR testing and certified presentation.

Comms Room & Server Room

Rack and cabinet builds, patch panels, PDUs, estate re-dressing, labelling to a structured ID scheme, out-of-hours migrations.

Containment

Basket, tray, ladder, trunking and conduit. Power segregation, earth bonding continuity and fire-stopped transits at compartment lines.

Testing & Certification

Fluke DSX channel and permanent link certification, OTDR trace and analysis, remediation and re-test — results handed over, not hidden.

MAC Works

Moves, adds & changes for occupied offices: desk moves, new outlets, patching changes — out of hours, documented every visit.

WHO WE WORK WITH

Offices

Warehouses & logistics

Hotels & F&B

Retail

Education

Healthcare

Co-working

Leisure

Industrial

Showrooms

+ the contractors who build for them

CAT6A — DRESSED, LABELLED, CERTIFIED

OM4 BACKBONE — SPLICED & PRESENTED

CONTAINMENT & RISER WORKS

FOR CONTRACTORS & PARTNERS

Your brand. Our teams.

Certified 2–6 engineer squads for your peak load — under your name, to your standard, with the paperwork done. Overflow, labour-only and small packages for cabling specialists, fit-out, M&E, electrical and main contractors, FM providers, MSPs and manufacturer installer networks.

TEAMS

2–6 engineers per squad · own supervisor / lead on every job

PRESENTATION

Unmarked vehicles · plain workwear · NDA-ready · no contact with your client

MOBILISATION

London base · UK-wide · 48-hour target where practical

COMMERCIALS

Day rate or per-point · clear written terms · labour / materials itemised

HOW WE WORK

01

Survey & scope

Site survey or your drawings and point counts — free of charge.

02

Fixed quote

Labour and materials itemised. Team names, cards and RAMS in advance.

03

Installation

Certified team with supervisor. Day, night, weekend and occupied premises.

04

Tested handover

Fluke certification, labelled estate, as-built documentation.

COMPLIANCE & INSURANCE

ITEM	DETAIL
Public Liability	£5,000,000 — certificate available on request
Employers' Liability	£10,000,000 — certificate available on request
Engineer cards	ECS Datacomms / CSCS, with IPAF & PASMA as the role requires — copies supplied before mobilisation
Safety	Job-specific RAMS issued before every mobilisation · site inductions and permit regimes followed
Company	GLOBALPROJOB LTD · Company No. 15232762 · CIS & VAT registered · England & Wales
Testing	Fluke DSX certification and OTDR results supplied with every handover

WHAT YOU RECEIVE AT HANDOVER

- Full test results for every link — Fluke DSX and/or OTDR, remediated and re-tested where required
- A labelled estate to a structured ID scheme, reconciled against the as-built port schedule
- Clean site, signed-off scope, and documentation in your format when working white-label
